

## Tailor Made Birding or Wildlife Tours for small or larger groups

We have an amazing amount of wildlife diversity in North and East Yorkshire. From the rolling hills full of wild flowers in the Yorkshire Wolds to the towering cliffs of Flamborough Headland where thousands of seabirds nest. The huge Humber Estuary full of waders to the heather moorland and great forests of the North York Moors National Park where Goshawks and Nightjars can be found. We can design a one day or longer stay be-spoke tour to suit you as an individual, your small group of friends or an organised group you belong to. We also do group holidays. Recent examples include a 5-day birdwatching and wildlife trip for Market Harborough Naturalists Society and a three-day forest tour for Cambridge U3A birdwatching group. These trips are also ideal for gifts, we can design you a tailor-made trip for a special person/s in your life. Our guides are expert professional birders and naturalists who are friendly and very keen to share their knowledge. Prices start at £65/person/day for larger groups or £80/person/day for small groups of up to four guests.
